

Fire risk assessment and information for residents

OLIVER LODGE
MARCH 2021

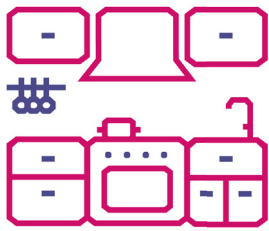

We're sharing fire safety information and the results of the latest fire risk assessment.

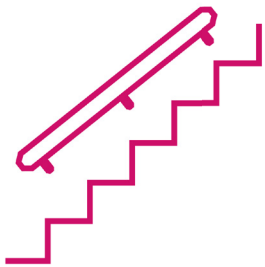

Please take some time to look at this document where you'll be able to find:

- How to reduce the risk of a fire
- How to maintain fire safety in your home and scheme
- What to do in the event of a fire
- The results of Oliver Lodge's fire risk assessment

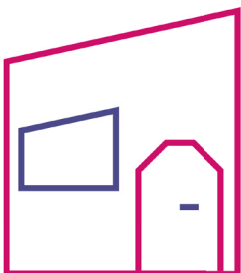

How to help minimise the risk of a fire

- Keep cookers and other electrical items well maintained
- Keep any equipment which gets hot, like the hob or microwave clear of things which could catch fire

- Keep all communal areas clear especially hallways and escape routes
- Smoke from a fire reduces visibility so these areas must be clear of any trip hazards

- Don't alter your front door. It is designed to withstand fire and smoke for 30 minutes and any alteration could reduce its effectiveness
- Make sure to report any issues with your door

What you should do in the event of a fire

If the fire has started in your flat...

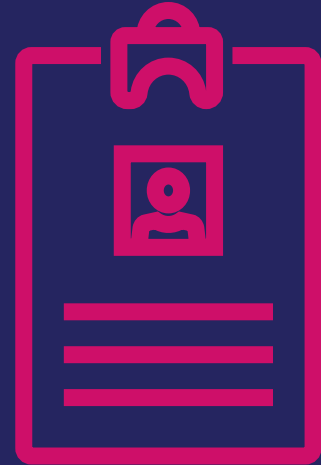

- 1** Close all internal doors
- 2** Use your front door to leave your flat and make sure it is closed
- 3** Do not use the lift
- 4** Exit the building using the stairs
- 5** Alert the fire service
- 6** Activate the fire alarm if safe

If you hear the fire alarm...

Oliver Lodge is designed to contain a fire within the flat where it starts. This means there is a delayed evacuation policy and it will usually be safe for you to stay in your own flat if the fire is elsewhere.

- 1** Make sure your front door is closed and stay in your flat until you are told to leave
- 2** If smoke or heat affects your home, you are told to leave by the fire service, or you are in any doubt, leave your home immediately
- 3** The fire service will take charge of the building in the event of a fire

Fire risk assessment results

The likelihood of a fire at this property is:

Medium

The resulting risk rating assessment of the building is:

Tolerable

In the event of a fire, the risk to life would be:

Slight harm

The risk to life from fire at this property is:

Tolerable

Please be aware that although the purpose of this is to place the fire risk in context, the fire risk assessment approach is subjective and for guidance only. If you spot any hazards or you'd like us to check your fire safety equipment get in touch.
